

ASTRO GOLD

Now you can clean **without foam** with **ASTRO GOLD**, the low to no-foam concentrate from Astro Products. This powerful formulation is biodegradable, safe, and easy to use.

Simply spray on with one of our handy metering devices such as the Astro Gold sprayer, PMP, or Handi-Flood; or apply with one of the many brushes available from Astro Products.

ASTRO GOLD penetrates rapidly and works fast to soften and suspend soil so that it can be easily rinsed away. Low foam makes rinsing very easy and complete. You will notice a nice sheeting action when you rinse and shorter drying times.

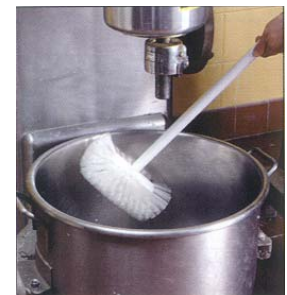

Easily applied with the **ASTRO GOLD** Sprayer

HS-1008

Stainless steel and other metals shine like new after being cleaned with **ASTRO GOLD**. For best results, metals that have a buildup of hard water deposits may need to be acid cleaned before using Astro Gold.

For faster cleaning, apply with the **ASTRO GOLD** Sprayer, agitate with a brush or nylon scouring pad and rinse.

Economical Central System

A central spray system can be installed in as little time as it takes to run the plumbing from the chemical room to the various departments that you want to clean. This system uses a water powered metering pump to move the solution to the hose drops. Dilution is accurate and automatic at the setting you choose.

ASTRO GOLD is a highly alkaline solution (pH 12.3) and should be handled with rubber gloves and eye protection.

Safe to use on most surfaces. If in doubt, test a small area before proceeding.

For use by meat packing plants, poultry plants, bakeries, nut processing plants, industrial plants. Use to clean processing equipment, walls, floors, forklifts, cars, trucks..... Low foaming properties make this an excellent choice for tray wash machines.
