

COUNTER STRIKE ODOR ELIMINATOR SYSTEM

The **Counter Strike Odor Eliminator System** is an advanced chemical spray system that employs a dependable peristaltic metering pump to spray odor control chemicals into garbage compactors. The wide angle spray nozzle and **Counter Strike Odor Counteractant** make odor problems a thing of the past!

Counter Strike is sprayed into the compactor with a wide angle nozzle. For most compactors, one nozzle will give adequate coverage. Multiple nozzles may be used for larger compactors. Contact Astro Products for details.

Dual timers give maximum flexibility in applying odor control chemicals. The repeat timer is set to spray automatically at whatever interval you desire and for as many seconds as you want it to spray. The single shot timer will spray for the number of seconds you have programmed each time the push button is pressed.

If you need to prime the nozzle or give an extra shot of **Counter Strike**, simply press the single shot button.

Disconnecting the nozzle for emptying the compactor is quick and easy with the handy quick coupler that is included with every **Counter Strike Odor Eliminator System**.

For odor control you can depend on, specify the **Counter Strike Odor Eliminator System**. When used with **Counter Strike Odor Counteractant**, you are assured of satisfied customers and no odor complaints.
