

# **QUICK WIPE**

Spray and Wipe Cleaner - NO Rinse Required

**Quick Wipe** is a special formula for use on equipment where no rinse is possible. A potable water rinse is not required following the use of this product on hard surfaces provided that the surfaces are adequately wiped-off before contact with food, so that no visible residue remains which can adulterate or have a deleterious effect on edible products.

This slightly alkaline product (pH 9.0—9.5) is excellent for removal of light soils from packaging equipment in snack food plants and other facilities where critical cleaning must be done around sensitive electronic equipment.

**Quick Wipe** is non-toxic, non-corrosive, non-flammable, and completely safe for use on all surfaces.

Don't take a chance on ruining sensitive electronic equipment by spraying water into places it shouldn't be. Use **Quick Wipe** to clean these areas quickly and easily - simply spray on and wipe off!

Active ingredients: aliphatic phosphate ester, sodium lauroamphoacetate, tetra sodium EDTA.
