

FOAM MASTER

The **Foam Master** from Astro Products, Inc. is a state of the art foaming machine that works off plant air and boosted water pressure.

The portable model is equipped with stainless steel cart, 50' foam hose, hose rack, and nozzle. Includes a five gallon chemical container that is designed to prevent spillage.

The **Foam Master** may also be wall mounted and hard piped with air and water. Instead of being mounted on the cart (as shown), the **Foam Master** is permanently mounted to the wall wherever needed. Wall mounted units make cleanup even easier. Simply deliver a jug of chemical to each location and start foaming without delay.

When used in combination with foaming concentrates from Astro Products, the Foam Master will make quick work of routine cleanup jobs without wasting chemical.
